

GASKET + PRESSURE PROFILE

PRE-ASSEMBLED | PRECISION-FIT | EFFICIENT

VARIANTS

- With 5 mm outer gasket
- Available system widths: 50 mm, 56 mm and 76 mm
- Standard or reinforced pressure profile

ADVANTAGES at a glance

Pre-inserted pressure profile gasket

More efficient processing: Significantly reduced processing times for customers thanks to lower personnel requirements and reduced production costs.

Simple processing: The 5-part outer gasket enables straightforward drainage and ventilation detailing.

Secure installation: The gasket's integrated thread prevents retraction until the pressure profile is installed.

Optimised material handling: No separate storage or handling of the gasket and pressure profile required.

Consistent quality: Machine-inserted gasket ensures higher precision and consistent quality compared with manual insertion.

Time-saving cutting: The pressure profile can be cut to length directly with the gasket in place.

DELIVERY all options at a glance

The delivery programme provides a clear overview of the available variants and configurations.
The following tables contain all relevant technical details and selection options.

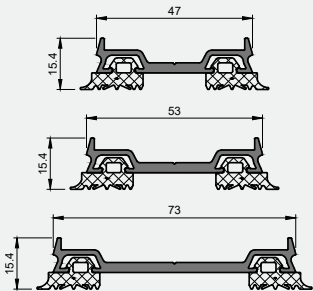

Product range

Technical information:

- Pre-drilled with Ø 6.5 mm at 250mm intervals
- With a 5 mm integrated pressure profile gasket

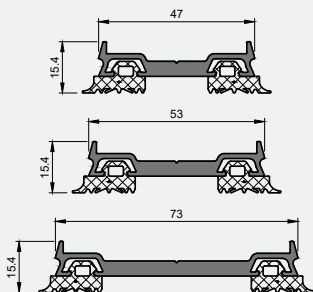

No.	Article	PU
118050	Pressure profile 47 punched D	6 m
118054	Pressure profile 53 punched D	6 m
118058	Pressure profile 73 punched D	6 m

Technical information:

- Pre-drilled with Ø 6.5 mm at 125 mm intervals
- With a 5 mm integrated pressure profile gasket

No.	Article	PU
118052*	Reinforced pressure profile 47 punched D	6 m
118056*	Reinforced pressure profile 53 punched D	6 m
118060*	Reinforced pressure profile 73 punched D	6 m
