Prefabricated Elements – Windows & Doors

With RAICO Bautechnik GmbH you have a recognised specialist for sophisticated building envelopes by your side: We develop customized solutions for curtain walls, windows and doors, which perfectly meet the requirements of our customers and partners.

As an additional service we are able to offer our RAICO window and door systems as ready-to-install prefabricated elements. The advantage for your project: more planning security, more cost certainty, easy installation – even for one-off solutions and small quantities.

Including technical know-how

With RAICO prefabricated elements, you also benefit from the expertise and development experience of our specialists when ordering small quantities – without additional costs and time expenditure for your project.

Working more productively with RAICO prefabricated elements

Large dimensions, small quantities and special solutions for windows and doors are usually costly and time-consuming. Take advantage of RAICO prefabricated elements, to make your service even more efficient:

- Professional and functional installation of all necessary components (fittings, motors, locks, etc.)
- Safe and properly packed transport for ready-to-install window and door elements
- Delivery on request – to your company or directly to the construction site
- Ability to provide escape and panic doors
- Provision of production documentation as well as maintenance and care manuals

Our additional service for prefabricated elements

- Safe: reliable pricing thanks to detailed, meaningful offers
- Sound: incl. planning services such as U value calculations, motor power calculations, fitting concepts, necessary static predimensions, if required, and much more
- Smooth: production planning, technical coordination by RAICO
- Comfortable: assistance in the documentation to the CE marking and NSHEV certification in accordance with DIN EN 12101-2
- Comprehensive: service from the beginning – incl. material procurement and coating of profiles
